

Primary Science Teachers' Handbook

This handbook contains practical ideas compiled from articles written by experienced teachers of primary science. It is a useful guide for those looking for different ways of approaching science in the primary classroom. Contents include:

- Science in the literacy block
- Inquiry-based learning
- Problem-based learning
- Scientific method
- Integrating ICT with primary science
- Getting involved with your professional association
- Science competitions and events
- Extending science beyond the classroom
- Resources lists

Electronics kit: The Brainbox 188

The fun way to learn the basic concepts of electricity and electronics

All components have snap fasteners which make assembly very easy and quick. Components are colour and number coded so that young children (and adults!) can easily follow construction diagrams.

The instruction booklet is easy to follow and has 188 ideas for constructing different circuits on a base board. The circuits can be activated by magnet, water, light, touch or sound and produce different kinds of reactions such as flashing bulbs, motorized fans, flying discs and various sound effects. Examples include a water activated doorbell, sound activated doorbell, magnetically activated motors, and electric fan.

Sample classroom activities are included.

Spare parts are available. Contact STAV Publishing for a price list.

Finding dinosaurs: Young Scientists at Work

Finding Dinosaurs introduces middle and upper primary students to the latest understanding of dinosaurs and other Mesozoic life.

The book is divided into 18 topics, each posed as a question for students to explore. Finding Dinosaurs encourages students to 'become scientists' – ask questions, propose and test theories, design experiments and discover for themselves the latest ideas about dinosaurs.

Essential Science Skills

A toolbox for the middle years

Essential science skills is a 126-page black line masters book for use with years 5 – 7.

Developing science skills and knowing how to apply them is an essential part of learning about science. Science skills such as communicate, investigate, use ICT, use scientific knowledge and many more are presented as student handout sheets. These are complemented with classroom strategies for use by the teacher and student skill builder worksheets – ready for photocopying and instant use. Student skill builders provide usable examples of how the classroom strategies can be implemented; they demonstrate how to explicitly teach the strategies and provide students with many opportunities to use them. A series of matrices show links with VELs and how the skills and classroom strategies are linked.

Discovering Science: Instant Lessons

Discovering Science is a series of six blackline master books designed to support teachers of primary science. The activities are ideally suited to teachers with a non-science background or who are inexperienced in teaching science. Each topic and activity has comprehensive supporting notes for the teacher, detailed equipment lists, step by step instructions and safety advice. The activities introduce students to a broad range of basic science concepts. They are fun, practical and encourage active involvement.

Lower Primary

\$29.95 per book Member/subscriber
\$32.95 per book Non-members

Book 1

On the rocks
Sowing seeds for the future
Slip, soaring away (force & motion)
Over water & under stone
Growing pains
Day & night
My lunchbox

Book 2

What fine threads you have there
Amazing air
Do the push, pull & twist
Splashing around
Mini Beast mania
Kitchen Chemistry
Waste not, Want not

Book 3

Fun with paper
Handy
Magnetic tricks
Balancing act
Soils, soils, soils
Get off the grass
Warm and windy

Upper Primary

\$29.95 per book Member/subscriber
\$32.95 per book Non-members

Book 4

Fine feathery friends
When is a worm not a worm?
The wise buyer strikes again!
Here one moment, where the next?
Waste reduction through recycling
Sounding off!
Our solar provider

Book 5

The human digestive system
Exploring sound
Square metre project
Greenhouse effect and global warming
Electro-magnetism
Sorting soil
Crystals
Worn by water

Book 6

Eat me, drink me
Stories from the earth
The great survivors
Paper: where would we be without it?
Electricity, you light up my life
What's missing?

Illuminated pocket microscope

A small, portable microscope that is ideal for young children, adolescents and adults to investigate a multitude of items including clothing fibres, plants, insects or any other scientific specimen. There is no need for small extracted samples – simply remove the slide tray, walk around the room and place the viewfinder above the item you wish to view.

The microscopes are small (14cm x 4.5cm), light (80 grams) and easy to grip, maneuver and adjust.

The light source is strong.

These small but powerful instruments are ideal for in the classroom, outside in the school yard, or for taking on excursions and fieldwork. They are fully portable and no bench or table is necessary for resting on.

Features

- Zoom switch – adjusts magnification power (60x - 80x - 100x)
- Direct light source to specimen
- Removable slide tray
- Focus wheel.

The light operates from two AA batteries (not included).

Sample classroom activities are included.
